Financial economics is the branch of economics characterized by a "concentration on monetary activities", in which "money of one type or another is likely to appear on both sides of a trade". Its concern is thus the interrelation of financial variables, such as prices, interest rates and shares, as opposed to those concerning the real economy. It has two main areas of focus: asset pricing and ...

A multinational company (MNC) is a corporate organization that owns or controls the production of goods or services in at least one country other than its home country. Black's Law Dictionary suggests that a company or group should be considered a multinational corporation if it derives 25% or more of its revenue from out-of-home-country operations. . However, a firm that owns and controls 51% ...
