In systematic reviews that lack data amenable to meta-analysis, alternative synthesis methods are commonly used, but these methods are rarely reported. This lack of transparency in the methods casts doubt on the validity of the review findings. The Synthesis Without Meta-analysis (SWiM) guideline has been developed to guide clear reporting in reviews of interventions in which alternative ...

There are two blocks in the design named block A and block B. Two PLLs serve two different clocks to the design. Design constraints will be defined at the I/O pins. I/O Pins 2, 6, 10 – Clocks are an important part of a design. As there are two PLLs in the above design, it is clear that there are two different clocks in the design.
