To get started, we will need to first talk about statistics. Statistics are facts or data based on a set of numerical information. The set of information is often about a certain group, such as a group of people. The statistics are used as a numerical way to describe that group, which is also called a population in statistics terms. For example ...

Weapons of Math Destruction makes some good points about the use and abuse of math models and big data. The most persuasive arguments focus on the use of predictive modeling and its use in criminal sentencing, monitoring driving habits to determine auto insurance rates, and monitoring physical fitness as part of health insurance coverage.
