Storing passwords. The recommended approach for reading passwords is to use a char[] array, instead of a String. The main reason for this, as explained in this SO answer, is that immutable Strings leave your passwords accessible until garbage collection (GC) kicks in, with a malicious process performing a memory dump of your Java process to do so. ...

The first big flag here is that there is a parameter that is not being used in this method. The second big flag is that it doesn't do what it says it does: it never actually sets annualInterestRate. Looking deeper, we can see other issues with monthlyInterestRate. I don't think you should be storing monthly interest rate at all in your class.

$n\%10$  means the modulus of 10, that is the remainder you get when you divide with 10. Here it is used to get each digit. Example: Say your number is  $n = 752$ .  $n\%10 = 2$ ,  $n/10 = 75$ . So you add 2 to the sumDigits(75). Now,  $n\%10 = 75\%10 = 5$ . This is the digit to be added and so on, till your  $n \geq 10$ . When it is  $< 10$ , you have a single digit that you just need to return as it is, as that is only the ...

Slim 4 Life Release is a water pill, essentially. It is designed to help maintain fluid balance in the body. In the case of this supplement, the main ingredient, java tea, has been shown in some research to work as a diuretic, according to research published in BioMed Research International. However, diuretics don't work for lasting weight loss.
