Hi Kevin. The habitation relay in the caravan is controlled by the power feed to the fridge circuit via pin 10 in the 13 pin connector. Pin 10 should only become live once there is an output from the alternator...i.e.when the engine is running, therefore the caravan battery can only become connected to the feed from pin 9 (permanent power connection) when the vehicle engine is running.

Here is a quick guide to basic fault finding on your caravan or trailer road lights. I've written this simply as I can in easy basic steps so that hopefully anyone with a little understanding will be able to ‘help themselves’ as much as they can before having to ask for assistance. I'll assume you...
