The engineering design process is a common series of steps that engineers use in creating functional products and processes. The process is highly iterative - parts of the process often need to be repeated many times before another can be entered - though the part(s) that get iterated and the number of such cycles in any given project may vary.. It is a decision making process (often iterative ...

Architectural drawing sizes are based on the ARCH scale, while engineering drawing paper sizes are based on the ANSI scale. D-size paper for architectural plans is 24" x "36" inches (or 609.6 x 914.4 millimeters), while D-size paper for engineering plans is 22" x 34" (or 558.8 x 863.6 millimeters).

Design engineers are problem solvers who bridge the gap between traditional engineering and design. It's a discipline which draws on knowledge of manufacturing techniques, product development, technical design and rapid prototyping to bring new innovations to market. It also focuses on improving existing products and the processes used for making them.
