This is one of the coolest caves I've ever been in. You start by taking an elevator ride down inside the mountain. Then you walk along a path learning about the history of the cave and all the formations. And finally ant the end of the path you reach it. A 90' waterfall. Absolutely amazing. Make sure y'all check this one out.

Observing Mitosis with Fluorescence Microscopy - Mitosis, a phenomenon observed in all higher eukaryotes, is the mechanism that allows the nuclei of cells to split and provide each daughter cell with a complete set of chromosomes during cellular division. This, coupled with cytokinesis (division of the cytoplasm), occurs in all multicellular plants and animals to permit growth of the organism.

Introduction. Friction is a force between objects that opposes the relative motion of the objects. In this project, you will be studying kinetic friction (also called sliding friction).When two objects are moving relative to one another, kinetic friction converts some of the kinetic energy of that motion into heat.
