Are we on the verge of solving the riddle of creation using Einstein's "greatest blunder"? In a work that is at once lucid, exhilarating and profound, renowned mathematician Dr. Amir Aczel, critically acclaimed author of Fermat's Last Theorem, takes us into the heart of science's greatest mystery. In January 1998, astronomers found evidence that the cosmos is expanding at an ever-increasing rate.

The subject of God's Equation is Einstein's field equation, at the centre of general relativity and hence of our understanding of the universe. Aczel is writing for a general audience, however, so he doesn't go into technical details (one or two equations make walk-on appearances, but no attempt is made to explain tensor analysis).
