The crew members of the Overseas Tankship (UK) Ltd were working on a ship, when they failed to turn off one of the furnace taps. This caused oil to leak from the ship into the Sydney Harbour. Morts Dock & Engineering Co (The Wagon Mound) owned the wharf, which they used to perform repairs on other ships.

A floating dry dock is a type of pontoon for dry docking ships, possessing floodable buoyancy chambers and a "U"-shaped cross-section. The walls are used to give the dry dock stability when the floor or deck is below the surface of the water. When valves are opened, the chambers fill with water, causing the dry dock to float lower in the water. The deck becomes submerged and this allows a ship ...
