The share of public sector employment relative to total employment varies considerably across OECD countries (), ranging from 8% in Korea and Japan, to 35% in Denmark. Governments also differ with respect to the amount of goods and services (e.g. in education or health care) they provide publicly to their citizens, and on how they provide those goods and services, with some governments ...

According to the supply and demand model of the labor market shown in many economics textbooks, increasing the minimum wage decreases the employment of minimum-wage workers. One such textbook states: If a higher minimum wage increases the wage rates of unskilled workers above the level that would be established by market forces, the quantity of unskilled workers employed will fall.
