The kernel of  $L$  is a linear subspace of the domain  $V$ . In the linear map  $L : V \rightarrow W$ , two elements of  $V$  have the same image in  $W$  if and only if their difference lies in the kernel of  $L$ : = (?)  
=.From this, it follows that

# Read Online Linear Algebra With Applications Leon Solutions

the image of  $L$  is isomorphic to the quotient of  $V$  by the kernel:  $V / \ker(L)$ . In the case where  $V$  is finite-dimensional, this implies the rank-nullity theorem:
