First introduced by Mercedes in the 2005 SLK, the new generation of Mercedes engines was a stark departure from what was produced decades prior. Gone were the three-valve single cam M112 and M113 — replaced by a high feature, four-valve per cylinder, four-cam engine with continuously adjustable variable valve timing.

The engine control module (ECU repair shop) sends out a signal to the ignition control module which in turn tells the spark plugs to ignite; ignition timing is also a key factor in this process. To take this even further, to improve engine performance and fuel the variable valve timing can sometimes be altered.

The reservoir dipstick has two marks. The upper one is when the engine is off. The lower one is for when the engine is running. It takes 5-10 minutes for the system to depressurize and the fluid to return back to the reservoir when the engine is shut off. Be sure to wait before checking the fluid level. Fresh fluid is clear with a green tint.
