The Apollo Lunar Module, or simply Lunar Module (LM / 𐀀 𐀁 𐀂 m /), originally designated the Lunar Excursion Module (LEM), was the lander spacecraft that was flown between lunar orbit and the Moon's surface during the U.S. Apollo program. It was the first crewed spacecraft to operate exclusively in the airless vacuum of space, and remains the only crewed vehicle to land anywhere beyond Earth.

Normally having to construct the base plate is a frustrating experience but this was detailed enough to make it a good experience and it really does give a great looking moon surface for the Lunar Lander to be displayed on. A fair number of stickers with this one and, as we know by now, I am not the greatest at attaching them.
