The v notch weir is widely used to measure open channel flow rate. It is especially good for measuring a low flow rate, because the area of flow through the v notch becomes quite small

Get Free Open Channel Hydraulics Solution Manual Sturm

the head over the v notch is still a measurable value. When a v notch weir is used to meter flow, the weir equation $Q = 2.49 H^{2.48}$ can be used to calculate Q , the flow rate over the weir (through the ...

Water flows under pressure (i.e., no free surface) in closed channel reactors (Figure 2.1 la). Drinking water UV applications have used only closed reactors to-date. Open channel reactors (Figure 2.1 lb) are open basins with channels containing racks of UV lamps. Open channel reactors are most commonly used in wastewater applications.

Optional high-flow hydraulics are available on 9 Family Tractors by ordering code 3270. The high-flow hydraulic system provides an additional 215 L/min (57 gpm) of flow for a total of 435 L/min (115 gpm). This system is ideal for hydraulic fan motor demands. This system is recommended for agricultural implements with continuous flow requirements.
