Goethean science concerns the natural philosophy (German Naturphilosophie "philosophy of nature") of German writer Johann Wolfgang von Goethe. Although primarily known as a literary figure, Goethe did research in morphology, anatomy, and optics. He also developed a phenomenological approach to natural history, an alternative to Enlightenment natural science, which is still debated today among ...

An experiment is a procedure carried out to support or refute a hypothesis. Experiments provide insight into cause-and-effect by demonstrating what outcome occurs when a particular factor is manipulated. Experiments vary greatly in goal and scale, but always rely on repeatable procedure and logical analysis of the results.

Science Advances is a highly selective, open access journal that publishes innovative, original research and reviews across a broad range of scientific disciplines. The Science Advances Editorial Board, a group of active researchers and scientists with a wide diversity of expertise, evaluates submissions and sends those that warrant further consideration for external peer review.

Chemical Science publishes all original research in one format: Edge articles. Chemical Science editors understand that traditional two- or three-page limits for the dissemination of new research are not suitable across all sub-fields of chemistry. Edge articles have absolutely no page limits, although we anticipate that most will fall between four and 10 pages.
