History. In 2004, Solr was created by Yonik Seeley at CNET Networks as an in-house project to add search capability for the company website. In January 2006, CNET Networks decided to openly publish the source code by donating it to the Apache Software Foundation. Like any new Apache project, it entered an incubation period which helped solve organizational, legal, and financial issues.

This data-config is where the action is. If you read the structure of the Slashdot RSS, it has a few header elements such as title, link and subject. Those are mapped to the Solr fields source, source-link and subject respectively using xpath syntax. The feed also has multiple item elements which contain the actual news items. So, what we wish ...
