The Physics of Wall Street: A Brief History of Predicting the Unpredictable by James Owen Weatherall was an interesting exploration of the history of probability, economics, and physics and how scholars in all those fields have crossed discipline lines and collaborated to understand and predict economic forces. I especially enjoyed how the ...

"Find me one job posting that specifically asks for a Bachelor's degree in Physics." D.E Shaw, Jane Street, Goldman Securities, etc. all would be more than happy to look at an applicant from physics. I just saw a Goldman listing on OCR looking for math, physics, or engineering undergrads for a trader roll.

Short it using CFD's if you are that way inclined. During my days of share trading I saw all sorts of similar stuff. That's why I gave away short term trading - first I was not that good at it and secondly long term trading based on buying when below a line of linear regression and selling when above worked well (ie relying on regression to the mean) and was much easier on the nerves.
