Although not very modern, we believe a wood thickness planer is one of the most important tools you should have in your workshop as a woodworker or carpenter. With a thickness planer, you can buy rough lumber and get them planed and dimensioned to the exact size, thickness and surface smoothness you want.

My experience has taught me that a few basic principles guide us on what will or will not work. Plumb, Level, and Square is some of those principles. 3-4-5 Rule To Ensure Square Layouts. Carpenters and builders often use the 3-4-5 method for squaring corners and ensure that the projects they are building have a precise 90-degree angle.

(2002) developed an efficient way, during school hours, to contact all of his 160 high school students' parents. He notes that these initial positive phone calls set the stage for more collaborative interactions later if needed, because parents were already an "ally." Another traditional occasion for dialogue is the parent-teacher conference.
