1. The Logic of Collective Action. The strategic structure of the logic of collective action is that of the n-prisoner's dilemma (Hardin 1971, 1982a). If n is 2 and the two members are able to coordinate on whether they act together, there can be no free rider unless one of the members is de facto altruistic. As represented in Game 1, prisoner's dilemma for two players is essentially the ...

Third, post-Keynesians seem to share a certain awareness of the limits to economic knowledge. This is reflected in a certain caution and modesty with respect to the reliability of economic predictions about quantitative variables (e.g. GDP growth or inflation) of a dynamic economy that is subject to structural change.

In economics, an externality is a cost or benefit for a third party who did not agree to it. Air pollution from motor vehicles is one example. The cost of air pollution to society is not paid by either the producers or users of motorized transport. The concept of externality was first developed by economist Arthur Pigou in the 1920s.. The prototypical example of a negative externality is ...

Economics is haunted by more fallacies than any other study known to man. This is no accident. The inherent difficulties of the subject would be great enough in any case, but they are multiplied a thousand fold by a factor that is insignificant in, say, physics, mathematics or medicine—the special pleading of selfish interests.
