Hello, undergrad Physics student here. I have a course called "Elements of Modern Physics" this semester. Looking for some good book recommendations. Note that I need a book for self-study as I have decided to skip out on lectures because they are online right now and combined with a bad prof, they are hard to understand.

Physics (from Ancient Greek: φυσική (ἐπιστήμη), romanized: physikḗ (epistḗmē), lit. 'knowledge of nature', from φύσις phýsis 'nature') is the natural science that studies matter, its motion and behavior through space and time, and the related entities of energy and force. Physics is one of the most fundamental scientific disciplines, and its main goal is to understand ...
